***Formal Matters***

In light of newly found art, the allowability of claims 29, 30 and 34 are withdrawn as presented below. Therefore, this Office action is non-final.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29, 30 and 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Whayne et al. (7,073,698). Whayne et al. disclose a method of performing a medical procedure using a medical probe essentially as claimed wherein the operative element is the electrode (8), the shroud is the surrounding shaft (4) which has ports (10) for applying a vacuum, and temperature sensors for sensing a signal at the target site (col. 5, line 41-col. 6, line 27, col. 7, lines 4-31, col. 8, lines 25-52, and col. 13, lines 36-60).

***Allowable Subject Matter***

Claims 2-4, 9-13, 17, 32, 35, 37, 39, 40, 42, 45-62 and 64-73 are allowed.

Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
